## Steering/Suspension - Idler Arm Grease Fitting

Bulletin No.: 03-00-90-001B

Date: January 20, 2006

### INFORMATION

Subject:  
Recommended Idler Arm Grease Fitting Due to Limited Access

Models:  
2003-2006 HUMMER H2

Supersede:

This bulletin is being revised to add model years. Please discard Corporate Bulletin Number 03-00-90-001A (Section 00 - General Information).

The idler arm on the HUMMER H2 has a grease fitting near the top end of the shaft facing the right-hand frame rail. Access to this fitting is very limited and may be accomplished, although not easily, with the use of a 90° grease gun adapter. However, to assure an adequate lubrication at each maintenance interval, it is recommended that the grease fitting be replaced with a 9° style fitting, P/N 09417903, pointing upward.

Part Number	Description
09417903	90° Grease Fitting

Parts Information

Warranty Information

Labor Operation	Description	Labor Time
E7939	Fitting, Grease – Replace	0.3 hr

For vehicles repaired under warranty, use the table.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
